

Reduce the expense, inefficiency, and security risks associated with sending paper charts for billing. Digitize and submit them from a mobile device with vChart from Ventra Health.

Simple and Secure

1. Navigate to a secure link from any smartphone or tablet.

2. Take a picture to input a medical record or supplemental documentation.

3. Submit the information to upload directly to Ventra's billing software.

4. Securely view your cases at any time, from anywhere.

Convenient and Efficient

Streamline the handoff between physicians and the billing team so you get paid faster.

Eliminate couriers and scanners

Upload documentation for immediate access by the billing team. Expediting this process can help reduce the number of days in A/R.

Reduce lag time

Physicians can easily submit documentation following their procedures, so charts don't stack up awaiting processing.

Improve document security

Direct electronic submission minimizes the risks inherent with handling and transporting paper charts.

Provide 24/7 visibility

Track cases and reconcile cases. Physicians can check from their mobile devices to confirm documentation has been submitted.

Go Digital

vChart is available to Ventra Health RCM clients with no additional fee. Contact your Client Success or Sales Representative to learn more.

“We're always innovating to provide our clients a better way to process their charges and improve revenue.”

~ Jason Greenberg, MD, Chief Client Officer
