

Anesthesia Revenue Cycle Management Services

Turning Anesthesia's Complexity Into Financial Clarity

Time-based payments, hospital subsidies, labor market challenges, and declining contract rates make anesthesia one of healthcare's most complex specialties, where small billing errors can quickly reduce cash collections. Protecting revenue requires precision and specialized expertise across this complex reimbursement landscape.

AI-Powered Solutions and White-Glove Service to Maximize Revenue

Ventra has AI-powered, data-driven RCM services that maximize revenue for radiology practices. With 25+ years of experience, a white-glove service model, and a team of specialized coders with deep expertise in modifiers and professional and technical-component billing, we deliver highly compliant and accurate coding results with an average **98% accuracy**.

How We Deliver

vCision™ AI & Automation

Advanced agentic AI and automation use Ventra's curated data to identify high-impact revenue cycle improvements.

Client Onboarding Process

Dedicated client success, project management, and technical resources ensure we can scale quickly and minimize cash flow disruptions.

Enterprise Service Delivery

Our global service delivery teams are Ventra employees, giving us greater control over scale, quality, and outcomes.

White-Glove Service

Client Success team members are hands-on, highly analytical partners who deliver high-touch, proactive support based on data insights.

Provider Enrollment

Our technology-enabled solution tracks enrollment from submission and revalidation through claims, integrated into the revenue cycle or as a standalone service.

Patient Responsibility

Our data-driven approach improves the patient payment experience, strengthens collections, and finds current insurance before billing.

Feeling confident about compensation affects the daily life of our providers, and it has a big impact on how they feel about working at Pacific Valley Medical Group. When potential new colleagues hear positive feedback from our current anesthesiologists about the business side of our practice, that really helps set us apart from other groups.

—Phillip Lau, MD, Managing Partner, Pacific Valley Medical Group

How We Optimize

Performance Surveillance Team

Our dedicated team of data scientists monitors your metrics 24x7x365 and mitigates issues before they impact your performance.

Provider Education

Coding and documentation experts educate your physicians to improve coding accuracy, reduce audit challenges, and increase revenue.

Payer Strategy & Contracting

We leverage longstanding payer relationships and vast rate-term data to support reimbursement strategies and contract negotiations.

How We Measure

vSight™ Data & Analytics

Ventra's powerful platform delivers daily, actionable insights into your practice's health and performance.

Core Service Metrics

We track and measure five core metrics that tell a complete story of your revenue health and provide actionable insights for mitigation and improvement.

Standalone Solutions

Coding Only

AAPC-certified coders deliver accurate, compliant charge-capture for complex specialties—supported by chart reviews, provider education, regulatory guidance, quick turnaround, consistent quality, and **98% average coding accuracy**.

Provider Enrollment Only

For organizations that don't work with Ventra for RCM, our enrollment specialists manage submissions, revalidations, and payer requirements as a standalone solution — keeping providers current and eligible to bill.
