

EMERGENCY MEDICINE

RCM & Billing Services for Emergency Medicine

AI-powered solutions and white-glove service to maximize revenue

High patient volumes, split/shared visits, complex E/M coding requirements, physician/facility billing reconciliation. Revenue retention in emergency medicine depends on mastery of a highly specialized reimbursement environment.

Ventra Health Emergency Medicine clients achieved an **8% increase in Collections per Visit (CPV)** on average over the past five years.

CODING ACCURACY

Ventra's Strategic Approach

Billing and coding are table stakes. With Ventra, your practice can expect an end-to-end revenue cycle management partner that is fully invested in your performance. Our teams are experts in emergency medicine RCM with longstanding payer relationships. Ventra led the industry in implementing the 2023 AMA E/M coding guidelines.

We work with private practices, hospitals, and health systems to deliver transparent, AI-enabled RCM solutions that solve the most complex revenue and reimbursement challenges.

How We
Deliver

vCision™ AI & Automation

Agentic AI and automation leverage Ventra's curated data to target high-impact opportunities across the revenue cycle.

Client Onboarding Process

Dedicated client success, project management, and technical resources scale quickly and minimize disruptions to cash flow.

Enterprise Service Delivery

Our global service delivery teams are Ventra employees, giving us greater control over scale, quality, and outcomes.

Provider Enrollment

One of the only RCM companies to fully integrate provider enrollment into the revenue cycle, tracked through revalidation.

Level of Care Task Force

A dedicated team appeals LOC underpayments and denials — downcoding can cut a practice's total revenue by as much as 15%.

How We Optimize

White-Glove Service

Client Success team members are hands-on, highly analytical partners who deliver high-touch, proactive support based on data insights.

Performance Surveillance Team

Our dedicated team of data scientists monitors your metrics 24x7x365 and mitigates issues before they impact your performance.

Provider Education

Coding and documentation experts educate your physicians to improve coding accuracy, reduce audit challenges, and increase revenue.

Payer Strategy & Contracting

We leverage strong payer relationships and our vast database of rates and terms to build data-driven support for reimbursement strategy and contract negotiations.

How We Measure

vSight™ Data & Analytics

Ventra's powerful platform provides actionable insights into your practice's health and performance. Metrics are updated daily so you never work with stale data.

Core Service Metrics

We track and measure five core metrics that tell a complete story of your revenue health and provide actionable insights for mitigation and improvement. Our RCM and data experts help you use them proactively.

Our Ventra team makes sure we have everything we need to hit our financial goals. Their white-glove approach allows us to trust that they are actively managing our revenue cycle. That gives us the space to focus on what matters most—the care of our patients.

—Dr. Justin McNamee, Medical Director, EMPros

Who We Are

Ventra Health is a leading business solutions provider for facility-based physicians in anesthesia, emergency medicine, hospital medicine, and radiology. We combine deep revenue cycle management expertise with white-glove service and transparent, AI-powered solutions — solving complex revenue and reimbursement challenges so clinicians can focus on patient care.

As one of the nation's most advanced technology-enabled RCM providers, Ventra delivers industry-leading technology, data and analytics, provider education, provider enrollment, and payer strategy and contracting.
